

## Radiator Fill – Pre Mix

### Description

Radiator Fill – Pre Mix is a ready for use pre mixed Anti-Freeze blended using deionised water and a high quality, imported ethylene glycol. Radiator Fill contains numerous anti-corrosive additives for the protection of all types of metal components such as Aluminium Cylinder Heads and Radiators used in modern day cooling systems. This product does not contain borates, phosphates, amines, nitrites and nitrates.

### Applications

Radiator Fill – Pre Mix is recommended as an all season cooling system protector. This product is suitable for use in passenger vehicles, commercial vehicles, farm vehicles and off highway equipment. Prior to filling a cooling system with Radiator Fill – Pre Mix, the system should be drained and flushed. This product has been pre-mixed at a 50/50 ratio.

<b>Mixing Ratio</b>	-	<b>Freezing point</b>
<b>1 : 1</b>	-	<b>-35°C</b>

### Performance

- BMW N 600 69.0
- Porsche 774 C
- VW 774 C
- Audi/Seat/Skoda 774 C
- Mercedes DBL 7700
- Ford ESD M97 B49-A
- Ford WSS-M97B44-C
- Man 324
- GM US 6277 M
- Opel GM QL 130100
- Volvo (Reg No. 260)

### Advantages

- Ready to use. No measuring or mixing required.
- Excellent protection for all types of material.
- Reduces freezing point.
- Increases boiling point.
